ENTRANCE SYSTEMS

OVER 30 YEARS OF EXPERIENCE PROVIDING WINDOWS & DOORS

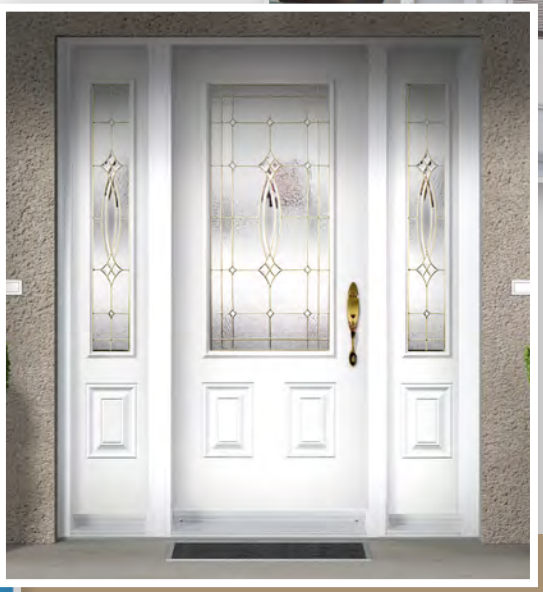
Entrance Systems

www.kentonl.ca

Kento

Since 1983, Kento has provided high-quality window and door products. In 1994 we started manufacturing vinyl windows in a vast selection of sizes and shapes. Our doors and windows help homes, churches, schools, hotels, and other buildings of all sizes handle the extreme weather that makes Atlantic Canada one of the most demanding environments on the planet.

Since our first days of business, Kento has built a reputation for providing quality products at competitive prices, backed by exceptional customer service.



What We Offer

Kento manufactures a complete line of entrance systems and also offers sliding patio door systems.

Our entrance system frames are available in wood, vinyl clad, and "never rot" composite. Slab options are available in steel and fiberglass. Custom painted and stained door options are also available. Kento customers love our exceptional service and dependable warranty.

Most windows are available in white or beige profile, with custom paint or stain finishes available by request.

Kento also manufactures ENERGY STAR qualified windows with excellent Energy Ratings (ER).

Ask your Kento dealer for details!

The Low-E glass, argon gas, and warm-edge spacer determine the **Energy Rating (ER)** of any window. But what exactly is an "Energy Rating"?

In Canada, ENERGY STAR is administered through a voluntary partnership of the Government of Canada and industry. The Energy Rating (ER) is a product's thermal performance measuring against national standards. This lets you compare products regardless of who made them. You can compare and then ask for Kento, secure in the knowledge that we make energy performance a priority through every step of every process!

Kento Saves Money and Energy

Conserving energy is important, and not just because it saves money. Saving energy can help save the planet, since the less fuel or energy we burn, the healthier we all are. So to help you *and* Planet Earth, Kento focuses on making our windows as energy-efficient as possible.

Low-E glass has a thin, metallic coating that is almost invisible to us but a significant barrier to the transfer of heat and UV rays. That means your home is more comfortable while your fabrics stay more colourful!

Argon gas is invisible and heavier than the air we breathe, making it an ideal insulator. We place argon between the panes of glass to increase our windows' energy efficiency.

The **warm-edge spacer** is a nonconductive spacer around the edges of and separating the panes of glass, to keep moisture and cold out of that space. This helps prevent condensation and gives you a clearer view in a wider range of weather conditions.

Decorative Choices

More than just a pretty place.

Yes, a Kento door is indeed a thing of beauty and precision, but it is also so much more. First, we are a virtually endless array of faces, whether it's the most delicate glass or bold statements in oak, mahogany, and other finishes, or the sturdy strength of metal.

Deep within the breathtaking styles and finishes though, each Kento door has been carefully engineered and manufactured to deliver the highest standards of trouble-free operation and years of dependable service.

Style. Engineering. Reliability. When you want the finest entrance system, you'll find it with Kento.

ǂ Also available in both 2214 and 2217 kit sizes.

Flare Silkscreen 2236

Prism Silkscreen 2236

We show these doors here in just one colour due to the limited space available, but offer them in an endless range of colours to match your particular palette.

Lighthouse Silkscreen 2236

Ask your local Kento dealer about these exclusive doors.

Dare to dream and live in your own breathtaking, unique designs and colours... with Kento!

ENERGY STAR

Double Doors

Double doors, Garden doors, and Terrace doors can all be completed in the **clear glass**, **15-lite French doors**, and the **raise-and-lower mini-blinds** shown to the left, as well as a virtually unlimited selection of other vented and decorative lite kits. Ask your building supply or windows and doors dealer for details, or see our website at **www.kentonl.ca**

Double Doors

Double doors can either have both doors operable or have one operating and one fixed. If both can open they require a center post. A **permanent post** provides best weather resistance and will remain in place even when both doors are open. An **astragal post** is attached to one of the doors and opens and closes with that door, providing easy access but less resistance to extreme weather.

(**LH**: Left-hand hinge **RH**: Right-hand hinge **I**: Inswing **O**: Outswing)

Garden Doors

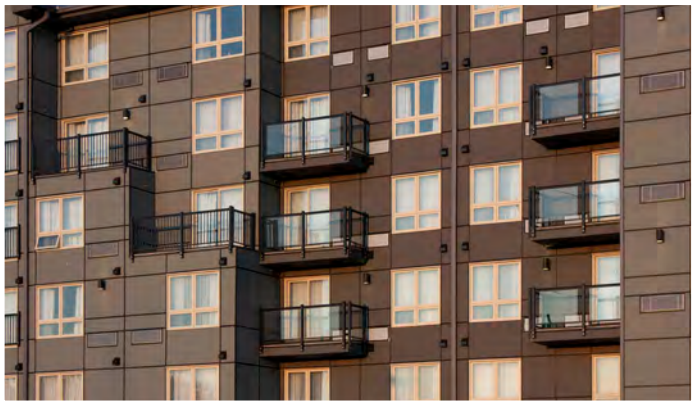
One door swings in while the other is fixed. A screen can slide across the outside to cover the opening when you want ventilation while keeping pests out. Garden doors are a good alternative to sliding patio doors.

Terrace Doors

One door swings out while the other operates somewhat similar to a casement window, able to be opened slightly to provide ventilation and with an internal screen in place.

Non-Residential Projects

From the smallest takeout restaurant to one of the biggest hotels in Newfoundland and Labrador, Kento has helped bring projects to life.



Whether for churches, office buildings, stores, or daycare centers, we have the insights, experience, and top-quality products to help ensure everything is installed on time and on budget.

Show us your plans. We'll show you the door. And window.

Your commercial project. Your home. Your cottage. Whatever size your project may be, Kento can help make it better. We have been manufacturing or distributing quality doors or windows for over 30 years, helping thousands of people bring their unique style to life.

Kento has styles from traditional to avant garde. For a full range of colours, styles, and possibilities, ask your local building supply store or window and door supplier about Kento doors and windows.

Show us your plans. We'll show you the door. And window.

Slab Choices

Victoria Shaker | Soho | Vog | Oso | Linea | Orleans | London

Sydney | Uno | 2-Panel Planked Camber Top | 4-Panel | 6-Panel | 2-Panel Camber Top | 3-Panel Scroll Top

More colours and possibilities than we can showcase here!

Your home is truly unique, so our teams have been busy developing door designs that can be adapted to any tastes.

From quaint or modest, all the way to downright grand, Kento will make sure your door fits right in.

For that designer touch, ask about our matching transoms.

You may have noticed several of the door kits shown here feature stunning transoms. Interested? Ask your local Kento dealer for details on our many transom styles.

Standard door system

- All 24-gauge galvanized steel slabs for strength.
- Injected polyurethane foam for warmth and strength.
- Fusion-welded corners on Brickmould.
- Pre-glued staples strength and stability assembly.
- T-nuts behind top and middle hinges for better strength.
- Hi-definition prefinished white slab.
- Jambs screwed into threshold for strength.
- Self-draining thermally broken threshold.
- Composite jambs include composite in place of wood in the threshold.
- Stainless steel hinges on all outswing doors.

Value-added optional items

- Fiberglass slabs for better look and improved durability.
- Fire-rated slabs as needed.
- Pre-drilled for deadbolts for better security.
- Outswing for windy locations to improve weather tightness.
- Vinyl cladding, composite, or solid vinyl jambs reduce maintenance.
- Sidelite combinations and transoms.
- Decorative glass lights in stock or custom sizes.
- Low-E glass and argon gas.
- Self-closing hinges.
- Door viewer.
- ENERGY STAR door with selected material.
- Stainable door light frames.

Available in Outswing & Inswing,
4 ⅝" & 6 ⅝" in both White and Beige.

Also available in wood with wood trim.
Vinyl Clad available with standard or 4" trim.

Exterior jambs and trims available with Brickmould in natural wood, vinyl clad, or composite.

Slabs available in 28", 30", 32", 34", 36", or 42".
Jamb depth available in 4⅝" or 6 ⅝".

Warranty

Kento Entrance Doors use only top-quality materials and are guaranteed to be free from defects in material and workmanship. Products found to be defective will be repaired, or replaced by a similar product.

2 YEAR PARTS AND LABOUR. 10 YEAR DOOR PANEL.
5/10 SEALED GLAZING UNIT

For service, contact your distributor, who will inspect and forward a "service-request form" to Kento. For products older than two years there is a labour charge to replace a sealed unit or door slab. All rates are subject to change without notice. Certain conditions apply. ***Not following instructions will void the warranty.*** See www.kentonl.ca for details.

Not covered under the warranty:

- Doors installed not level, plumb or square.
- Glass breakage or surface scratching.
- Damages from negligence, accident, improper handling, or incorrect installation.
- Adjustment to screens or door sweeps.
- Weatherstrip that has been painted.
- Rust, for non stainless steel components.
